ASSIGNMENT INDIVIDUAL AND SOCIETY(BEGC-131)

Programme: BAM/2024-25

Course Code: BEGC-131

Dear Student,

You are required to do **one** assignment for the course 'Individual and Society' (BEGC 131). It is a Tutor Marked Assignment (TMA) and carries 100 marks. It covers four blocks of the course.

Aims: The TMA is primarily concerned with assessing your proficiency in English. You should not reproduce chunks of information from the passage(s) but effectively use the skills of reading and writing that you may have acquired during the course of study to compose your answers. These assignments aim to teach as well as to assess your performance.

Guidelines: You will be required to answer the questions on reading comprehension, vocabulary, grammar and composition.

As in day-to-day life, **planning** is important in attempting the assignment as well. Read the assignment carefully; go through the units on which the questions are based; jot down some points regarding each question and then re-arrange them in a logical order. In the essay-type answer, pay attention to your introduction and conclusion. The introduction must tell you how to interpret the given topic and how you propose to develop it. The conclusion must summarize your views on the topic. **You should submit the assignment in your own handwriting.**

Make sure that your answer:

- a) is logical
- b) is written in simple and correct English
- c) does not exceed the number of words indicated in your questions
- d) is written neatly and clearly.

Please remember that it is compulsory to submit your assignment before you can take the Term End Examination. Also remember to keep a copy of your assignment with you and to take a receipt from your Study Centre when you submit the assignment.

Last Date for Submission of Assignment:

For June Examination 31st March

For December Examination 30th September

Good Luck!

Note: Remember the submission of assignment is a precondition for appearing in the examination. If you do not submit the assignment on time, you will not be allowed to appear in the examination.

INDIVIDUAL AND SOCIETY

ASSIGNMENT

(BEGC 131)

Programme: BAM/2024/2025

Course Code: BEGC 131

Max. Marks: 100

There are three sections in this assignment
attempt all the sections

SECTION A

1. Read the following passage and answer the questions in your own words.

(5 x 2=10)

The effects of plastic bags on the environment are really quite devastating. While there are many objections to the banning of plastic bags based solely on their convenience, the damage to the environment needs to be assessed too. There is no way to strictly limit the effects of plastic bags on the environment because there is no disposal method that will help to eliminate the problem. While reusing them is the first step, most people don't do that. These bags are not durable enough to survive numerous trips to the store. The best a citizen can do is to reuse them. The biggest problem with this is that once they have been soiled they end up in the trash, which then ends up in the landfill or is burned. Either of these solutions is not good for the environment. Burning emits toxic gases that harm the atmosphere and increase the level of VOCs in the air while landfills hold them indefinitely as a part of the plastic waste problem throughout the globe.

One of the greatest problems is that an estimated 300 million plastic bags end up in the Atlantic Ocean alone. These bags are very dangerous for the sea life, especially for those of the mammal variety. Any hunting mammal can easily mistake the size, shape and texture of the plastic bag for a meal and find its airway cut off. Needless deaths from plastic bags are increasing every year. The environmental balance of the waterways is being thrown off by the rate of plastic bags finding their way into the mouths and intestinal tracts of sea mammals. As one species begins to die off at an abnormal rate, every other living organism in the waterways is also impacted. The indefinite period of time that it takes for the average plastic bag to break down can be literary hundreds of years. Every bag that ends up in the woodlands of the country threatens the natural progression of wildlife. Because the breakdown rate is so slow the chances that the bag will harmlessly go away are extremely slim. Throughout the world plastic bags are responsible for the suffocation deaths of woodland animals as well as for inhibiting soil nutrients. The land litter that is made up of plastic bags has the potential to kill over and over again. It has been estimated that one bag has the potential to unintentionally kill one animal every three months due to unintentional digestion or inhalation.

While it's a noble thought to place the plastic bags in the recycling bin every week, studies have proven that there are very few recycling plants that actually recycle them. Most municipalities either burn them or send them off to the landfill after sorting. This is because it can be expensive to recycle this type of plastic. It doesn't melt down easily and is often not fit to be reused in its original form. The premise of recycling these bags is nice. Yet funding for the upgrading of the recycling units just has not happened and thus less than 1% of all bags are sent to recycling plants worldwide. Most are left to become a pollution problem in one way or another. There are always alternatives to

plastic bags and the search for better and more alternatives continues. Paper bags are a possible option, but they also take their toll on the environment. The use of trees to increase the production of paper products will also have a negative environmental effect. Reusable plastic bags are being introduced to regions that want to outlaw the plastic bags altogether. These are stronger and more durable and can be used for three to five trips to the store. Of course, the reusable cloth bag is fast becoming a favourite among the environmental supporters. While so far no bag is without its issues, these are the bags that are currently recommended for use to help protect environmental concerns.

1. Why there is no way to strictly limit the effects of plastic bags on the environment?
2. How are plastic bags dangerous for the sea life?
3. Why it is difficult to recycle plastic bags?
4. What are the alternatives to plastic bags?
5. Give a suitable title to the passage.

2. Use the following words in sentences of your own:

1. Melange
2. Whooping
3. Elevation
4. legendary
5. Multicultural

(5x2=10)

SECTION B

(3x10=30)

1. Write a speech on the Protection of Wildlife.
2. Write a dialogue between two friends discussing about the importance of the conservation of the environment.
3. Write a report on the Celebration of Earth Day in your locality.

SECTION C

1. Imagine you are the manager of a hotel in Andaman Beach Resort. Write an email confirming the reservation of the accommodation to the customer. 10
2. Write an essay on impact of globalization on the environment. 20
3. Imagine that your friend is visiting Delhi with her family. Write a letter to your friend suggesting a good hotel to stay in Delhi. 20
